

The Nation's Most Effective
Program For Locating And
Rescuing Missing
Alzheimer's Patients

Did You Know....?

About 250,000 families in America are affected by Down Syndrome. Wandering is a known behavioral risk for young children with this impairment.

In a National Autism Association online survey, 92 percent of children that are autistic tend to wander.

About ten percent of all litigation against long-term care communities involve resident elopement.

There are currently more than 127, 000 critical wandering incidents involving Alzheimer's patients annually in the USA.

SIGN UP FOR PROJECT LIFESAVER TODAY!

1233 East Second Street
Casper WY 82601***

Natrona County Project Lifesaver

*"The Experts That Bring
Your Loved Ones
Home."*

NATRONA COUNTY PROJECT LIFESAVER'S MOTTO: "DEDICATED TO BRINGING YOUR LOVED ONES HOME"!

FREE!

The Natrona County Emergency Management Agency, in partnership with the Natrona County Sheriff's Office, the Wyoming Medical Center Foundation, the Casper Police Department and Casper Fire and EMS has brought Project Lifesaver to assist its residents who have medical conditions that may cause them to wander. These services are provided at no cost to the families in need. The project is a rapid-response partnership aiding victims and families suffering from Alzheimer's disease and other dementia related disorders and conditions such as Down syndrome, brain injuries and Autism. There are other programs out there but Project Lifesaver is the only proven reliable lifesaving system available.

- ⇒ Alzheimer's Disease
- ⇒ Autism
- ⇒ Down Syndrome
- ⇒ Dementia
- ⇒ Brain Injury
- ⇒ Other Medical Conditions

WHAT IS PROJECT LIFESAVER?

Project Lifesaver relies on proven radio technology and specially trained search and rescue responders. Clients that are enrolled in the Project Lifesaver program wear a personalized wristband that has the appearance of a large watch. When caregivers notify the local Project Lifesaver agency that a person is missing, a search and rescue team responds to the wanderer's last known location and starts searching with the mobile locator tracking system. The clients bracelet emits a tracking signal that can be heard with the mobile locator tracking system. **Search times have been reduced from hours and days to minutes. Recovery times average less than 23 minutes. In over 2,950 searches, there have been 0 reported serious injuries or deaths.**

COST

Thanks to our Sponsoring Agencies, Natrona County is able to provide Project Lifesaver services with little or no cost to each family.

- ◆ *Radio Technology that provides tracking through a wristband worn by the participant.*
- ◆ *Rescue teams from the Natrona County Sheriff's Office, Casper Police Department, and the Fire Department.*
- ◆ *Reduced search time from hours and days to minutes*
- ◆ *A proven lifesaving system that is reliable, responsive, practical and affordable.*
